TECHNICAL SKILLS

Frontend: React.js, HTML5, CSS3, JavaScript, Redux
Backend: Node.js, Express, Knex, Sqlite3
Version Control (GIT), REST API Services

PROJECTS

How-To App, GitHub   January 2021
Back End Developer
- Ensured application's security and ability by building app to interact with multiple APIs and databases using Knex, Sqlite3, with the goal of viewing, updating, adding, and deleting how-to instructions.
- Designed API and developed RESTful services

Plant App, GitHub   July 2020
Front End Developer
- Defined structure and components for plant shopping app utilizing React.js and Redux, allowing more items to be added, deleted, and edited to list
- Implemented multiple-item purchase page structure using CSS3, HTML5, and Bootstrap
- Created night mode and day mode using React.js and Redux to create dynamically changing website

Expat Journal, GitHub   June 2020
Front End Developer
An app designed to see photos laid out in a grid. Users can create, read, update and delete stories and photos.
- Developed web-app using React, Redux, HTML5/CSS3 that provides a professional platform for experts to share their travel photos and detailed descriptions globally
- Communicated with both backend developers and marketing team to gather user requirements. Connected application API and marketing page to the home page. Utilized axios call and HTML tag
